Subject FW: Clayton Chemical Parties MDNR documents

Tom,

These are the Missouri DNR documents we obtained in a FOIA request and are regarding Clayton Chemical.

On the question you had regarding Rogers Cartage, the only person to say that the Rogers facility in Cahokia had storm water flowing west was the Rogers expert, Bob Johnson. Mr. Johnson testified that he did not think Rogers had a facility in Cahokia, but even still he says he went to the site and saw that the flow of the water in the ditch along Cargill Road from where the Rogers facility was alleged to be located flowed to the west. This was based on his observations in 2002, and not on any historical information on the Rogers Cahokia facility.
